End-User Enrollment Steps (DEP/ADE)

1. Power On the Device

- Turn on the new iPhone/iPad.
- Follow the initial **Setup Assistant** screens (language, region, Wi-Fi).

2. Automatic Enrollment Prompt

- After connecting to Wi-Fi, the device contacts Apple servers.
- You'll see a message like: **"This device is managed by [Organization Name]."**
- Tap **Next** to continue.

3. Complete Setup Assistant

- Depending on what IT chose to skip, you may or may not see screens for:
    - Apple ID sign-in
    - Siri setup
    - Touch ID/Face ID
- Just follow the on-screen instructions.

4. Device Management Installation

- The device automatically installs the **management profile** from Intune.
- You may be asked to confirm: tap **Allow** or **Install** if prompted.

5. Sign In with Work Account

- Enter your **work or school account** credentials when asked.
- This links the device to your organization.

6. Company Portal (if required)

- Some organizations also require the **Company Portal app** for compliance.
- If prompted, download it from the App Store and sign in.

7. Finish Enrollment

- Once setup is complete, the device is enrolled in Intune.
- Policies, apps, and configurations (like Wi-Fi, email, Teams, Outlook) are automatically applied.
- You can now use the device for work securely.
