**Enrolling an iOS Device in Microsoft Intune**

**Step 1: Install Company Portal**

- Open the **App Store** on your iPhone/iPad.
- Search for **Microsoft Intune Company Portal**.
- Download and install the app.

**Step 2: Sign In**

- Open the **Company Portal app**.
- Sign in with your **work or school account** (provided by your organization).

**Step 3: Begin Enrollment**

- Tap **Begin** to start the enrollment process.
- Follow the prompts until you reach **Device Management**.

**Step 4: Allow Device Management**

- When prompted, tap **Allow** to let Intune manage your device.
- This will redirect you to install a **management profile**.

**Step 5: Install Management Profile**

- Go to **Settings > General > VPN & Device Management**.
- Tap the **Management Profile** listed.
- Tap **Install** and enter your device passcode if required.
- Confirm installation.

**Step 6: Verify Compliance**

- Return to the **Company Portal app**.
- Tap **Done** once the profile is installed.
- The app will check compliance with your organization's policies.

**Step 7: Access Work Resources**

- Once enrollment is complete, you can now access:
    - Work email
    - Teams, OneDrive, SharePoint
    - Other protected apps and resources
